

WHY DOC2?

Creating contracts, SLAs, NDAs and employment offers are all a routine part of running a business. But often, you are left creating these documents yourself – copying and pasting from old templates, retyping company details and double-checking formatting.

This takes time and increases the risk of mistakes, which can then cause issues around compliance. Doc2 simplifies the entire process of creating professional documents by turning your existing Word templates into accurate, branded, ready-to-sign documents in seconds.

Unlike traditional eSignature platforms that rely on you providing static PDFs created elsewhere, Doc2 is a complete document generation and signing tool that reduces the risk of incorrect information being used, enhances brand consistency and frees up your time.

THE CHALLENGES DOC2 SOLVES

Contracts and professional documents must be accurate, up-to-date and in line with current regulations. Many businesses still rely on manual processes which are time-consuming, repetitive, prone to errors and inconsistent in formatting and branding. They are also often difficult to track and manage once sent for signing.

Doc2 removes these risks by automating document creation and eSigning in one place.

It guides you through a simple question-based process and automatically pulls verified data from places like Companies House or your CRM system. With Doc2, you can ensure every document is correct, compliant and professionally presented.

BENEFITS OF DOC2

Create contracts up to 10x faster

Generate professional, ready-to-sign documents in seconds from existing Word templates.

Present a consistent, professional brand

Every contract is correctly formatted and aligned with your brand guidelines.

Reduce errors and risk

Automatically pull verified data and eliminate the risk of mistakes from manual processes.

Simple document creation

Doc2 creates documents through a simple question-based process.

Stay compliant and in control

Built-in compliance controls and approved templates ensure every document meets current standards.

Full visibility and audit trail

Every signed document includes clear audit history and eSigning certificates for peace of mind.
