

Action1

Cloud RMM for MSPs

1st 100 Endpoints

**FREE
FOREVER**

First 100 Endpoints Free Forever

- Deploy patches tested by Action1 RMM
- Real-time visibility: vulnerabilities and assets
- Flexible endpoint management with customisable scripts
- Remote desktop compliant with privacy laws
- 100 endpoints free forever without feature limits

Keep Your Endpoints Up-To-Date & Secure with Action1 RMM

Action1 is a provider of the #1 secure and easy-to-use cloud RMM that delivers real-time visibility into vulnerabilities and IT assets. It enforces security risk mitigation via policy-based patching and deployment of OS and third-party apps, and offers remote desktop compliant with modern privacy laws.

With Action1 cloud RMM software, internal IT teams and MSPs can efficiently support the modern in-office, remote, or hybrid workforce from virtually anywhere in the world.

Real-time Visibility

Users can create new reports or customise existing to achieve real-time intelligence about vulnerabilities, IT assets, and missing security updates for both OS and 3rd party apps.

Software Deployment

Manage software distribution and schedule rollout of updates centrally. Optimise distribution with a built-in cloud app store and software inventory tools.

Endpoint Management

Run commands, custom scripts, PowerShell scripts, reboot computers and restart services remotely directly from Action1 web console.

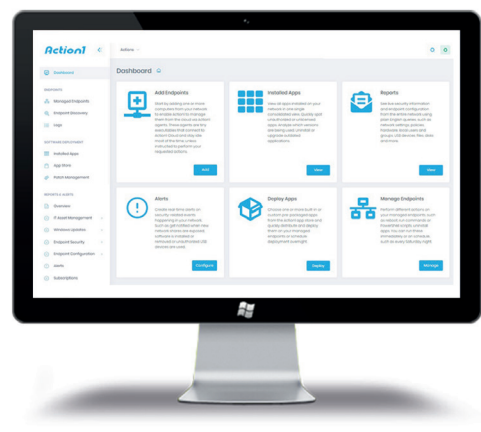

Remote Desktop

Troubleshoot issues and support remote users right from your web browser — without any additional integrations, client software, firewalls, or VPNs.

Patch Management

Automatically deploy Windows and third-party patches and detect missing updates to streamline maintenance and enhance security across all workstations and servers.
