

ARISTA
Edge Threat Management

ETM Dashboard

Designed to simplify the lives of administrators, ETM Dashboard is a remote monitoring and management platform that provides a single pane of glass of network appliances and applications.

As a cloud service, ETM Dashboard updates are seamless and automatic, providing immediate access to the latest improvements. Real-time firewall, router and endpoint status alerts help with site management and maintaining regulatory compliance.

Network Security Orchestration

As part of Edge Threat Management, ETM Dashboard gives you visibility and control over the whole network across all NG Firewall and Micro Edge deployments. All NG Firewall and Micro Edge appliances can be managed remotely from a single login. ETM Dashboard is ideal for organizations with multiple networks or locations to protect, monitor and manage.

Simplified Management

Reduce management overhead by handling a range of tasks remotely with ETM Dashboard. It's easy to make one-to-many policy changes across locations, then keep appliances in sync automatically. See appliance status briefly, including uptime, bandwidth utilization, and network traffic summaries. Get valuable auditing logs about administrative changes, key to regulatory compliance. Manage licensing, software updates, backups and more.

Zero Touch Provisioning

Easily configure NG Firewall and Micro Edge appliances remotely. Customers or partners with multiple locations and limited IT staff can simply set up

the appliance to fit the needs of each location without the need for physical access.

Endpoint Security

ETM Dashboard's integration with Bitdefender, Malwarebytes and Webroot provides administrators an easy way to see not only the status of remote NG Firewalls and Micro Edge's, but also monitors connected endpoints on the network. Drill down into detailed information about hosts, get alerts when threats are detected, or even initiate an endpoint protection scan.

Included with a Subscription

All customers with paid subscriptions of NG Firewall and/or Micro Edge deployments can utilize ETM Dashboard and benefit from advanced management including configure and push templates, automatic backups, alerts and endpoint protection integration.

Edge Threat Management

ETM Dashboard

ETM Dashboard Features

ETM Dashboard gives you visibility over the whole network and across all NG Firewall and Micro Edge deployments. All NG Firewall and Micro Edge appliances can be managed remotely from a single login. ETM Dashboard is ideal for organizations with multiple locations to deploy, protect and manage.

Dashboard

ETM Dashboard gives you an immediate picture of what's happening on your Edge Threat Managed networks.

Appliances

See critical information about each NG Firewall and Micro Edge deployment, manage those deployments via remote access, and get alerts and threat history details for each appliance.

Policies

Easily view, configure, clone and push policies across appliances for a “configure once, deploy anywhere” methodology that reduces management overhead.

Account

Easily manage all licensing, provisioning, and billing information across your Edge Threat Management account.

Alerts

Receive global alerts across deployments: improving visibility, ensuring business continuity, and easing management for multi-site deployments and MSPs.

Hosts

View real-time host activities across all deployments. Gain visibility into the security status of each host running Bitdefender, Malwarebytes, or Webroot endpoint protection.

Reports

Access to 30-day aggregated reports for all deployments connected to ETM Dashboard.

Networking

Group NG Firewall and Micro Edge appliances into a defined network. Automatically connect appliances, view aggregated performance data, and create and push shared WAN Rules across all your Micro Edge appliances.
