

Deliver Cyber Essentials Certification to your customers in 24 hours

What is Cyber Essentials?

What is it? Cyber Essentials is the UK Government's scheme to help you to guard your organisation against cyber-attacks.

- Aims to protect against 80% of common cyber-attacks
- A University of Lancaster study showed it prevented or mitigated against 99.3% of all attacks
- Cybercrime cost the world circa \$6 trillion in 2021

Why do you need Cyber Essentials?

1. Show your clients and prospects that you take Cyber Security seriously, and that their data is safer with you than with your uncertified competitors.
2. You get a snapshot of how secure you really are, so that you can see whether you need to make any changes. Money spent in prevention can save you losing fortunes in losses.
3. Assurance that you are protected from most common cyber-threats.
4. Cyber Essentials is a requirement for any company in a UK government supply chain. If it is good enough for government then you should set this as your cyber security standard too.

How to get Cyber Essentials?

CyberSmart is the easiest way to not only get to certified standard (with a guarantee of not failing) but it will help you maintain that standard throughout the year.

Key features of CyberSmart:

- Certification within 24 hours
- 100% guaranteed pass*
- Live support, guiding you through the questionnaire step-by-step if needed

*CyberSmart gives you the tools and guidance to achieve a guaranteed pass by having all the necessary controls in place prior to submission
