OCTIGA
Office365 Security

Gain the confidence to deliver Office 365 security in clicks rather than weeks

Deploy and maintain best practice baseline configurations and remediate breaches

Microsoft Office 365 is becoming ubiquitous. It is linked to your client's business, data and employees, devices, processes, email, sharing, data storage, and remote access. However, administering its security is challenging, complicated and VERY time-consuming.

Clients expect MSPs to deliver security best practices as part of essential Office 365 service offerings.

One-click secure SaaS for super busy MSPs

- Confidence to deliver coherent security services

- Easily maintain service standards as your clients evolve

- Reduced risk of client breach through best-practice security

- Reduced time and effort through automation

- Reduced cost of the breach through continuous alerting

- Increased client retention through continuous audits and client checkpoints

How does Octiga Office 365 automation secure your clients?

Octiga offers a holistic security posture-as-a-service with its multi-tenant dashboard serving as a single place for the complete security journey protect-detect-remediate across all your clients. Our solution is entirely cloud-based and only requires a one-time secure one-click sign-in using Microsoft Office 365 credentials. Gain client trust by demonstrating proof of service with our game-changing features for MSPs.

1 **Best practice customisable security baselines**

Confidence to deliver security best-practice effortlessly.
Octiga delivers out-of-the-box best practice baseline automation templates.
Customise, save and re-deploy security configurations to standardise or fit each client's unique business needs.

2 **Monitoring on autopilot**

It continuously monitors for both legacy AND new breaches, internal risks and threats, and misconfigurations of security controls. Remediate them within the app in a single click.

3 **Rapid alert-triage-remediate with confidence**

Unburden your bottle-necked level 3 admins with effortless contextual triage & instant remediation.
Save the cost of breaches in seconds.
One Incident = One Ticket with our PSA integrations.

4 **One-click remediation everywhere**

Single-click fix for all security gaps on one multi-tenant dashboard.
Instant corporatewide security achieved for config, users, Azure AD groups, mailboxes, Teams, SharePoint, Intune and everything 365 in a few clicks.

5 **Continuous audit with gap analysis and reports**

Identify and remediate security gaps continuously.
Audit, prioritise, generate reports and fix risky configurations & security shortcomings automatically on an ongoing basis. All in-app, in a few clicks.

One super-fast SaaS automation solution to fit your clients' unique business needs

Let us transform the way we deliver multi-client Office365 Security!
