

Smarter Backup for MSPs

Redstor looks after your data

Backup & Recovery

Whether your data is on-premises, hybrid or in the cloud, Redstor's pioneering technology provides streamed, on-demand access to all your data.

Cloud Data Archiving

Dramatically cut your primary storage costs by offloading data to the cloud with Redstor and still have immediate access to your archived data. Best of all, no user training or ongoing management is required.

Malware Detection

Redstor uses machine learning to detect, isolate and remove malware within your backup data. This drastically reduces your chances of inadvertently restoring a malicious file, delivering peace of mind.

Disaster Recovery

The survival of your business could depend on how quickly you respond and recover from a disaster. Redstor can help you meet your recovery targets with instant recovery. Traditional backup and recovery methods could take days or even weeks to get your data back.

Microsoft 365 Backup

Protect all the Office 365 data within your organisation, directly from Microsoft's cloud to the Redstor cloud, all through an intuitive web interface.

Google Workspace Backup

Avoid the risk of storing all of your data with one provider. Protect the Google Workspace data within your organisation – directly from Google's cloud to the Redstor cloud – and manage it all through a single application.
