Why partner with Adoptech?

Compliance frameworks like ISO 27001 and DORA are becoming a necessity for many businesses – and MSPs must be able to help clients navigate the challenges of certification.

Adoptech makes achieving and maintaining compliance, audits and certification across multiple frameworks simple. The cloud-base SaaS platform provides a comprehensive, fully managed solution that guides organisations to full compliance within their chosen framework. Adoptech's hands on support allows businesses to easily secure, certify and scale security compliance in a single platform and has a 100% certification pass rate.

Get audit ready + Get audited + Maintain compliance = Scale your business

Challenges Adoptech solves

Achieving compliance isn't straightforward. Navigating multiple standards, aligning security controls and managing documentation takes a significant amount of time, money and resources. Adoptech solves this. It automates workflows, makes monitoring controls and keeping track of moving parts easy through one dashboard. Integrating with tools businesses already use, up to 90% of tasks can be automated, significantly reducing costs and saving time.

Opportunities for MSPs

As more and more organisations choose to work with businesses who hold accreditations like ISO 27001, being able to deliver a service which makes achieving and maintaining compliance simple is essential for MSPs. Adoptech allows you to support any size business to automate and streamline security processes, reviews and audits to meet global, regional and industry regulations that help meet compliance standards. This is all combined with expert guidance and support which no other vendors match.
