

Deliver expert DSAR support to your clients with a fully outsourced, cost-effective solution.

Why partner with Contextul?

Contextul is a Data Subject Access Request (DSAR) service built for MSPs. As growing regulatory pressures increase and DSAR requests rise, organisations need reliable, expert support. By offering Contextul, you can offer your clients a secure, managed DSAR service - reducing the cost and time it would take to complete them independently while positioning yourself as a compliance partner.

Challenges Contextul solves

DSARS are complex, resource intensive and time consuming. When handled in-house, they can distract teams from daily responsibilities, take weeks to complete and can introduce significant compliance risks. Most businesses don't have the capacity or expertise to manage DSARS effectively. Contextul solves this, allowing you to deliver a DSAR service that streamlines the entire process including retrieval, redaction, legal review and disclosure. Streamlines the process - all you need to do is gather the data set. Contextul will then perform all discovery, redaction and review, providing a complete disclosure-ready data set for your clients.

Opportunities for MSPs

Contextul offers you a powerful way to expand your service portfolio with a high-demand compliance solution. Following a quick discovery call and with no training or infrastructure requirement, you will be able to quickly deliver real value to your clients. This DSAR as a Service lets you can strengthen relationships and position yourself as a trusted advisor in today's evolving regulatory landscape.

Key features

- Allows you to offer clients end-to-end DSAR management
- Delivered by experts in data protection and compliance
