

# Adoptech

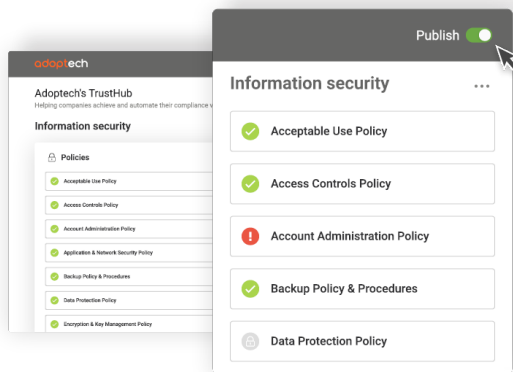

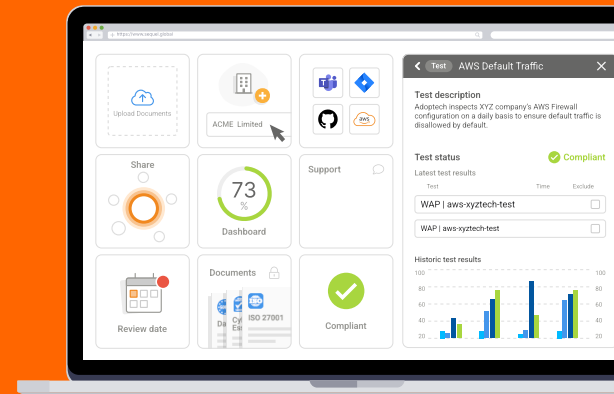

Simplify achieving and managing compliance, audits and certifications for your business

## Why Adoptech?

When you need to achieve and maintain compliance regulations or be audit-ready, it can take a huge amount of time and resources - for a busy business, this is difficult to stay on top of.

Adoptech makes achieving and maintaining compliance, audits and certification across frameworks like ISO27001, SOC 2, DORA and GDPR simple, saving endless hours of work. The cloud-based platform allows you to easily secure, certify and scale your security compliance all with expert support and guidance.

## Challenges Adoptech solves

More and more organisations are looking to work with businesses that hold certain compliance certifications as it provides a level of trust and commitment to security, but meeting the requirements of compliance frameworks isn't straightforward.

Navigating the various standards, security controls and documentation is difficult and it's easy to make a mistake. Adoptech eliminates the challenges, automating 90% of tasks, streamlining security processes, reviews and audits to meet a range of industry regulations that help meet compliance standards.

## Benefits of Adoptech

- ✓ **100% certification pass rate** – achieve and maintain compliance, audits and certification standards for ISO 27001, SOC 2, GDPR, DORA and more.
- 🕒 **Save time and resources** - automated compliance management streamlines compliance tasks, reducing the risk of errors.
- 🕒 **Stress-free monitoring and management** – view and access policies, reports and certifications in one dashboard.
- 💡 **Expert support** – Adoptech's consultative service provides all the support required to achieve and maintain compliance.
- ⬆️ **Scalable** – as your business grows, continue to meet compliance standards without increasing workload.
- 🔒 **Complete peace of mind** - Adoptech's continuous monitoring gives real-time insights, stays ahead of compliance risks and keeps your business audit ready.
