

Contextul

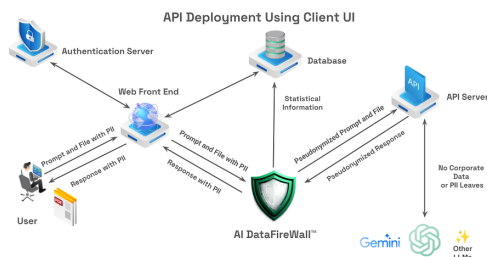

Reduce the complexity of DSARs. We can manage and support your DSAR through Contextul.

Why Contextul?

Handling Data Subject Access Requests (DSARs) is a growing challenge for many businesses. Being able to respond quickly and accurately is vital. But, completing a DSAR can be costly, time-consuming and require a lot of resources.

Contextul is a leading outsourced DSAR service that allows us to simplify the entire DSAR process for our customers. Led by data compliance experts Contextul finds the relevant content for the DSAR from information you provide, applying redactions where necessary and if relevant, applying lawful exemptions. It streamlines the entire process, speeding up response times and ensuring you meet compliance regulations.

Challenges Contextul solves

If you're managing DSARs in-house, it can easily overwhelm even the most efficient teams. Requests can take weeks to complete and often require specialised legal and compliance expertise. If you don't handle them correctly, it can lead to regulatory penalties and reputational damage.

With Contextul we take pressure out of DSARs. Whether you're responding to one request or many, we will provide you with an efficient service that minimises disruptions to your team.

Benefits of Adoptech

- **Complete DSARs quickly and efficiently**
- **Contextul will securely, accurately and efficiently process the data you provide**
- **Have complete peace of mind that the relevant redactions and lawful exemptions are implemented where necessary**
- **A full audit trail for every DSAR, ensuring transparency and simplifying compliance reporting**
- **DSARs can be completed in as little as 48 hours - far less time than if you were to complete them independently**
- **Reduce the cost of completing a DSAR in-house by up to 94%**
- **No matter the size of your business, Contextul allows us to support you with DSARs**
- **No training or onboarding is required**
