

# Automated compliance for Cyber Essentials

## Why CyberSmart?

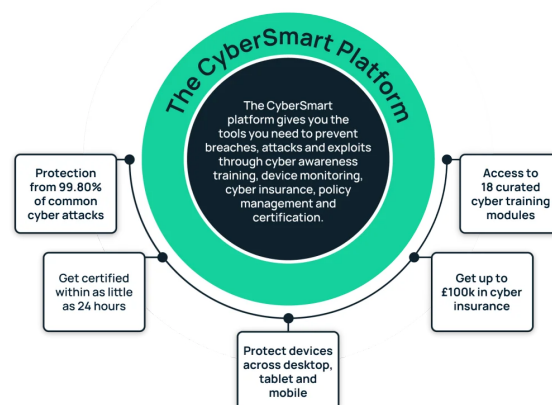

CyberSmart makes compliance stress-free and achieving cybersecurity certifications simple. The all-in-one security platform monitors devices for vulnerabilities, helping you maintain continuous compliance.

Gain complete cyber confidence with round-the clock monitoring, real-time reporting and remediation, training and policy management. CyberSmart will help you proactively manage risk, meet compliance requirements and build a strong security posture.

## The challenges CyberSmart solves

Cybersecurity is complex and constantly evolving, making it hard to maintain strong, compliant defences. The Cyber Essentials scheme defines essential controls that prevent around 99.8% of common cyberattacks - but staying compliant across all devices is a challenge.

CyberSmart simplifies this by continuously monitoring your entire Cyber Essentials framework. It alerts you instantly if any device falls out of compliance and provides detailed reports every 15 minutes. This real-time visibility streamlines the Cyber Essentials certification process, helping businesses achieve and prove strong cyber hygiene quickly and easily.
