Objection handling

Can Heimdal's Email Security module integrate with our existing email platform?

Yes, it's designed to integrate seamlessly with a wide range of email platforms. Whether you're using Microsoft Exchange, Office 365, G Suite, or other popular email systems, the module can be deployed without disrupting your current setup.

How does Heimdal ensure compliance with industry regulations regarding email security?

The Email Security module meets industry standards and regulations such as GDPR, HIPAA, plus others. The solution includes features like data encryption, secure archiving, and audit trails to help maintain compliance regulatory requirements. Regular updates and enhancements also adapt to changing compliance standards.
