Managed Extended Detection & Response (MXDR)

Heimdal®

Why Heimdal?

Heimdal offers an end-to-end, proactive, unified cybersecurity suite built to defend against next-gen threats.

The unique, multi-layered approach provides comprehensive protection across all areas. Through Heimdal, you can experience advanced protection across your organisation, from endpoints and networks to emails and beyond.

The challenges Heimdal's Managed Extended Detection & Response solves

Staying in control and keeping organisations secure is an ongoing challenge. The sophistication and increase in attacks is continually growing and add this to expanding workforces, makes it more and more difficult to maintain robust cybersecurity defences.

Proactive approaches to detection and coordinated responses are crucial to minimise the impact of a cyberattack. Threats need to be swiftly identified and quickly mitigated before damage can happen. Heimdal's Managed Extended Detection and Response (MXDR) service is driven by the Heimdal XDR - Unified Security Platform. It is specifically designed to support modern enterprises, helping them safeguard against threats through a detect and respond service.

The proactive team of experts and Security Operations Center (SOC) works closely with IT and security teams in real-time, taking a combined approach to threat-hunting and response. AI-driven detection and machine learning provide insight into behaviour patterns and threat visualisation and the advanced investigation team swiftly respond to any investigations minimise the risk of down time and loss of productivity. MXDR requires minimal configuration and gets protection up and running instantaneously.

Benefits of Heimdal's Managed Extended Detection & Response

Heimdal's Managed Extended Detection & Response offers the following benefits:

Reduce the risk of enterprise-wide security risks through 24/7 proactive monitoring, alert and remediation for all clients.

Minimise MTTD and MTTR with proactive and automated responses across a network, endpoints, emails, access, identity and more.

Remove alert fatigue and streamline crucial and imminent threats without manual practices.

Enable internal teams to focus on key objectives while trusting Heimdal to deliver advanced investigations and forensics.

24/7 coverage from Heimdal SOC analysists.

Provide recommended best practices.
