

Why KnowBe4?

Phishing attacks are a continuous threat and to stay a step ahead regular training is crucial. KnowBe4 is a market-leading security awareness training platform designed to help users understand the threats of social engineering.

Creating a robust human firewall, KnowBe4 significantly diminishes the likelihood of you or your team falling victim to cyber attacks.

KnowBe4's range of customisable phishing simulation templates are designed to address and strengthen your cybersecurity strategies and are proven to reduce the risk of successful attacks.

The challenges KnowBe4 solves

Technology doesn't have the ability to prevent all phishing attacks, which is why it's essential to build a positive security culture. KnowBe4's innovative approach to security training empowers you to recognise and combat social engineering, combining ongoing education, guidance and entertainment.

Effective training means you and your team can spot malware, ransomware, phishing and social engineering attacks, helping you make smarter security decisions, mitigate risk and prevent damage. KnowBe4 simulates attacks, collecting and testing the results to provide a detailed view of organisational risks, it also monitors risky behaviour, alerting you when it is spotted.

Benefits of KnowBe4

Raise awareness

Train employees to spot the signs of malicious email attacks, encouraging vigilance when opening/responding to emails or opening any links or documents.

Increase cybersecurity defences

KnowBe4 helps fortify the human firewall, which adds a crucial layer of defence for your business that other cybersecurity products can't provide.

Reduced malware & ransomware infections

Awareness training reduces the risk of a successful attack.

Reduced data loss

Awareness training reduces the risk of data loss.

Real time threat detection

KnowBe4 proactively identifies risky behaviours as well as turn reported emails into training simulations.

Create a strong security culture

Create a safe space for employees to raise security incidents and for exposure to be a positive learning experience.

Make training fast and entertaining

By providing short and entertaining training content and simulations, your employees won't feel overwhelmed with information or lose engagement.

Ongoing cybersecurity training

Enjoy continuous training with sessions every 3 weeks helping mitigate risk over a long period of time and create increased results.
