Octiga battlecard

Company overview

octiga

· Octiga is a Microsoft 365 security posturing and monitoring software.
· Through a single dashboard, Octiga helps organisations achieve Microsoft 365 security best practice through a simple and affordable cloud security solution

Product

Octiga was created to support every stage of the Microsoft 365 security lifecycle,

- Best practice baseline templates
- Gap analysis & risky configuration remediation
- Breach detection and alerting
- One click remediation
- Incident response with prioritisation
- Latest PSA integrations
- Client reports & proof of service

Benefits

- Customisable – security templates can meet the needs of any business
- Cost saving – continuous monitoring searches for and quickly identifies suspicious activities. Effortless triage and instant remediation saves the cost of breaches in seconds.
- One-click remediation everywhere – instant security access across Entra ID groups, mailboxes, Teams, SharePoint and everything in M365.
- Reliability – continuous audits, gap analysis and reports identify and remediate security gaps.

Objection handling

Isn't Microsoft 365 already secure?
There are many great security features in Microsoft 365 but there are still gaps. Octiga ensures there are no gaps or breaches in your security posture.

How is Octiga different to other competitors?
Octiga is the only one in the market to do custom baselines, audits and alerts

Do I need a premium licence?
No. Unlike other products on the market, Octiga features can be used on a standard licence.

We already have Acronis – why do we need Octiga?
Octiga adds proactive Microsoft 365 protection and covers areas Acronis doesn't address, strengthening your security and cloud environment even further.
